Devices with AnyDesk

◆▷ **AnyDesk**

Your ID & Alias

AnyDesk ID is a unique 9-digit code assigned to each AnyDesk client. It is the address for your device allowing others to connect to you.

AnyDesk Alias serves as a personalized device address, offering a convenient alternative to the AnyDesk ID. It makes connecting easier, giving your address a distinctive identity.

AnyDesk

Connect to a remote device

To connect to the remote device, follow these simple steps:

1. Install AnyDesk on both devices.
2. Get the remote device's AnyDesk ID.
3. Enter the ID in the Remote Address field and click → or press Enter.

Learn more

Unattended Access

With Unattended Access, you can manage and control your remote devices even when no one is physically present at the other end.
To use the feature:

1. On the remote device, open the AnyDesk client and go to Settings > Access.

2. In the Unattended Access section, click Set password, and create a password.
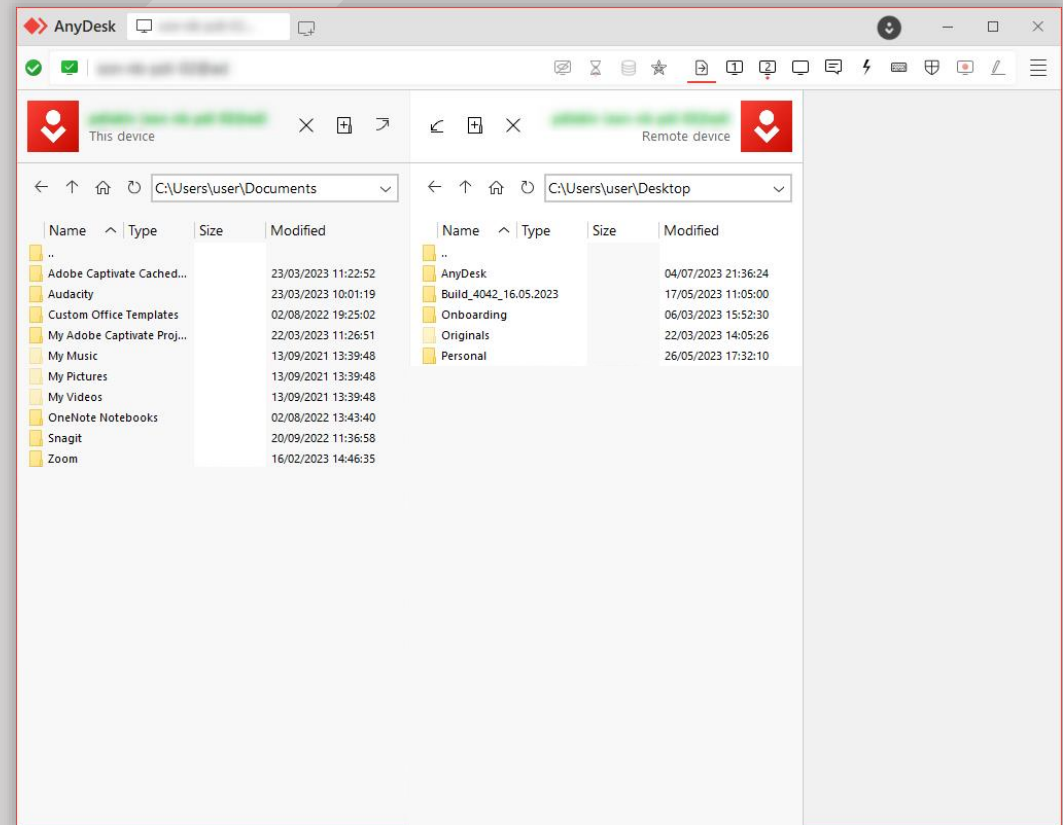

3. Click Apply.

Address Book

By creating your own Address Book, you can store and manage the AnyDesk IDs of the devices you regularly connect to.

Think of it as a contact list specifically designed for your remote desktop connections.

To use this feature, a free my.anydesk II account is needed. Create yours today!
